Performer™

Platform Licenses
Delivering Value

Our flexible, scalable system allows your team to access the power of Performer's data and analytics regardless of your organization's size.

Start-Up License

Our start-up program is designed for biotechs and other organizations, such as new CROs and functional area vendors, with fewer than five active Phase 2–4 trials. Performer helps start-up groups start assessing performance in a more rigorous manner and build a benchmarking database that will grow with your company.

Individual License

Individual licenses are available for organizations of any size with unlimited trial assessments and personnel contributions.

Enterprise License

An enterprise license enables a robust, organization-wide, performance management system and process. The full capabilities of Performer are available to anyone within the company and the standard fee includes quarterly, one-on-one consulting with CRO Analytics experts.

Collect smart data and make smarter decisions in meeting the challenging and changing demands of clinical trials. To learn more about the Performer platform visit us at croanalytics.com.

Performer Platform

Utilizing different assessment modules, ranging from trial management, site management and beyond, covering the gamut of clinical research. Performer is a cloud-based, SaaS platform providing the data you need to make informed, timely decisions to improve the efficiency and quality of your clinical trials.

Trial Management Module™

This module specifically looks at key drivers of performance in clinical trials, at each key stage of the trial, highlighting strengths and weaknesses of the team.

The resulting information helps guide decisions and course correct the direction of a trial to ensure timeliness, effectiveness and success.

CRO Analytics provides the only validated performance data collection system, providing straightforward access to reliable benchmarking, key performance drivers and predictive analytics in an intuitive format.

Our assessment tools and services make clinical research better, faster and less expensive.
